

TABLE OF CONTENTS

Volume 1

Page No

SMOKE AND TOXICITY

Computational and physical scale modeling of smoke movement in high speed trains <i>Mariano Lázaro, D Alvear, J Capote, GIDAI Group, University of Cantabria and I Saez, I López, A Arbildi, Aeronautical Technologies Centre – CTA, Spain</i>	1
Advanced CFD modeling approach of smoke toxicity and light extinction for well ventilated and less well ventilated fires in a compartment (Part II) <i>Andrea Löhnert, Nils Monreal, C Knaust, A Hofmann, BAM Federal Institute for Materials Research and Testing, Germany</i>	13
A method to evaluate alternative fire safety strategies <i>Craig Weinschenk, G Forney, J Averill, NIST and R Ranellone, Worcester Polytechnic Institute, USA</i>	25
Ignition and toxicity evaluation of selected aircraft interior materials using the cone calorimeter and FTIR analysis <i>Abdulaziz Alarifi, L Witty, G Andrews H Phylaktou, The University of Leeds, UK</i>	37
Accuracy of FTIR toxicity measurements of smoke gases produced by train products <i>Tuula Hakkarainen, VTT, Finland</i>	49

FIRE DYNAMICS

Simple ceiling jet correlation derived from numerical experiments <i>Nils Johansson, J Wahlqvist, P van Hees, Lund University, Sweden</i>	61
Temperature properties of ceiling jet in an inclined tunnel <i>Yasushi Oka, Yokohama National University, H Oka, National Maritime Research Institute and K Matsuyama, Tokyo University of Science, Japan</i>	73
Experimental study of radiation emission from corrugated cardboard flames <i>Dong Zeng, M Chaos, M Khan, S Dorofeev, FM Global, USA</i>	85
Fire dynamics in façade fire tests: Measurement and modelling <i>Johan Anderson, R Jansson, SP Technical Research Institute, Sweden</i>	93

PV PANELS

Systematical fire tests of PV modules – research on fire resistance, toxicology and burning behaviour <i>Bernd Teichmann, S Krüger, BAM Federal Institute for Materials Research and Testing, Germany</i>	105
Fire risk assessment and mitigation of PV electrical plants according to the Italian National Fire Services guidelines <i>Piergiacomo Cancelliere, Italian National Fire Services, Italy</i>	115

MODELLING

A generic combustion modeling and species transport framework for fire dynamics simulator <i>Jason Floyd, Hughes Associates and C Weinshenk, R McDermott, NIST, USA</i>	127
--	-----

Testing the single zone structural fire design hypothesis
Danny Hopkin, Trenton Fire Limited, UK139

Parameter uncertainty assessment for fire modeling in nuclear power plants
Marc Janssens, S Mohanty, Southwest Research Institute and A Kurzawski, University of Texas at Austin, USA151

Numerical simulation of fire growth on corrugated cardboard commodities in three-tier-high rack storage arrays
Prateep Chatterjee, Y Wang, M Chaos, K Meredith, X Zhou, S Dorofeev, FM Global, USA163

Numerical simulation of fire spread in elevator shaft connected to adjacent lobby in tall building
Kondapalli Venkatasubbaiah, R.Harish, Indian Institute of Technology Hyderabad, India175

Experimental and numerical study of smoke movement through soot concentration in a staircase of the Parisian Metro
Axel Bellivier, G Meyer, H Bazin, Laboratoire Central de la Préfecture de Police and J Hassanaly, Régie Autonome des Transports Parisiens, France185

FIRE SAFETY ENGINEERING

SFPE's guidelines for or substantiating a fire model for a given application
Morgan Hurley, SFPE, USA.....195

Fire scenarios for fire engineering – designers choice or generic by regulation??
Peter Johnson, D Barber, C Gildersleeve, Arup, Australia205

An experimental study of fires in the vertical shaft under stack effect
Xuemin Niu, Y Hasemi, T Ito, Waseda University and K Kagiya, Building Research Institute, Japan217

Experimental determination of the discharge coefficient of a doorway using the SPIV technique for fire-induced flow applications
Amine Koched, H Pretrel, L Audouin, IRSN and O Vauquelin, Université Aix-Marseille, France229

FIRE SAFETY ENGINEERING

Smoke flow through a horizontal vent separating two mechanically ventilated rooms from large scale fire tests
Hugues Pretrel, J Liberati, L Audouin, IRSN and O Vauquelin, Université Aix-Marseille, France241

Onset of plug-holing in atria by modelling the fire with a helium source
Caroline Peresson, University of Ulster, FireSERT, UK / WSP Flack+Kurtz, France and M Delichatsios, M Suzanne, J Zhang, University of Ulster, FireSERT, UK253

ADVANCES IN DETECTION, SUPPRESSION AND EXTINGUISHMENT

Image processing based deflagration detection within crew compartments of armoured vehicles
Felix Kümmerlen, Bundeswehr Research Institute for Protective Technologies and NBC Protection Munster and Thomas Schröder, K Krüger, Helmut Schmidt University Hamburg, Germany.....265

Smoke detection in high ceiling spaces
Raman Chagger, R Chitty, BRE Global, UK.....277

Effectiveness of bus engine compartment fire suppression systems
Francine Amon, J Brandt, SP Technical Research Institute, Sweden.....289

Theoretical modelling of sprinkler sprays
Siaka Dembele, H Aghajani, J Wen, Kingston University, UK.....295

Validation of spray water distribution patterns for the K11.2 sprinkler in the presence of a rack storage fire plume generator
Karl Meredith, P Chatterjee, X Zhou, Y Wang, H-Z Yu, FM Global, USA307

ADVANCES IN DETECTION, SUPPRESSION AND EXTINGUISHMENT

An experimental study of pre-wetting effects on fire propagation in parallel panels
Sai Kumar Thumuluru, Y Xin, FM Global, USA317

Identification of fire suppression mechanisms by water mist: Experimental and numerical analysis
Alexandre Jenft, Université de Lorraine / Centre National de Prévention et de Protection, P Boulet, A Collin, Université de Lorraine and G Pianet, A Breton, A Muller, Centre National de Prévention et de Protection, France327

Experimental and numerical studies of smoke/mist interactions in a corridor
Romain Morlon, Université de Lorraine / CSTB, P Boulet, G Parent, Université de Lorraine, S Lechêne, E Blanchard, C Rebuffat, P Fromy, CSTB, JP Vantelon, ENSMA and C Balayre, PROFOG, France339

Watermist protection of low hazard occupancies – standardisation approach to applying the technology
Louise Jackman, K Annable, S Colwell, BRE Global, UK351

FIRE RESISTANCE: TEST METHODS

Different types of plate thermometers for measuring incident radiant heat flux and adiabatic surface temperature
Johan Sjöström, SP Technical Research Institute and U Wickström, SP Technical Research Institute / Luleå Technical University, Sweden.....363

Development of a fire test method for documentation of fire resistance capabilities when fire exposure from above the structure represents a hazard
Espen Daaland Wormdahl, C Sesseng, SINTEF NBL, Norway373

POSTER PAPERS

POSTER SESSION 1

The propagation of flame over an inclined porous bed wetted with flammable liquid under airflow conditions
Jafar Zanganeh, B Moghtaderi, N Alston, The University of Newcastle, Australia.....383

Implementation of improved Eddy Dissipation Concept (EDC) combustion model in Fire Dynamics Simulator (FDS)
David Johansen, B Husted, Stord/Haugesund University College, Norway389

The Discretized Radiation Method, a method to perform heat radiation calculations for arbitrary shaped flame geometries
IJM Trijssenaar-Buhre, H Boot, A Mack, TNO, The Netherlands395

Identification of temperature and species within real flames using IR spectrometry data <i>Bernard Porterie, Y Billaud, Y Pizzo, A Kaiss, Aix-Marseille Université and A Collin, R Berfroij, Z Acem, G Parent, P Boulet, Université de Lorraine, France</i>	401
Numerical simulation of decomposition and combustion of an epoxy-carbon-fiber composite <i>Amanda Dodd, B Shelden, Sandia National Laboratories and K Erickson, Consultant, USA</i>	407
Effect of humidity and moisture content on the combustion of materials from household furniture <i>Axel Bellivier, D Garcia, A Thiry, M Suzanne, H Bazin, Laboratoire central de la Préfecture de Police, France</i>	413
Complying with fire safety performance requirements when installing blast resistant laminated glazing systems for sub-surface locations <i>Sam Sambasivan, London Underground Limited and J Murrell, Exova Warringtonfire, UK</i>	419
Fire performance of HV/EHV cables installed in tunnels <i>James Robinson, Borealis Polymers, Belgium, G Alexander, Olex, Australia, C Phillipczyk, NKT Cables GmbH, C Dinkelmeyer, Nexans, Germany, K V Poulsen, NKT Cables A/S, Denmark, P Almeida, Solidal, Portugal, G Evenset, Nexans, Norway and W Loyens, Borealis AB, Sweden</i>	427
Fire safety challenges of green buildings <i>Brian Meacham, R Cheng, B Poole, Worcester Polytechnic Institute, USA and J Echeverria, Worcester Polytechnic Institute, USA / Universidad de Navarra, Spain</i>	433
Survey on the status of Fire Safety Engineering in Europe <i>Michael Strömgren, D Lange, SP Technical Research Institute, Sweden</i>	439
The design of more secure pressurization systems in staircases of highrise buildings <i>Michael Haas, P van de Leur, A Winthorst, DGMR Consulting Engineers, The Netherlands</i>	445
Quantitative analysis of fire risks in tall buildings <i>David Charters, C Sherwood, BRE Global, UK</i>	451
Smoke and heat emissions as the measures of interaction of tested elements with test environment in fire resistance testing <i>Miroslav Smolka, Rockwool International, Denmark and Y Suurenbroek, Suurenbroek Consultancy, The Netherlands</i>	455
Effect of laboratory size, ventilation and external influences on cone-calorimeter results <i>Hideki Yoshioka, National Institute for Land and Infrastructure Management (NILIM), T Hayakawa, Tokyo System Vac (TSV), Y Tanaike, HKY Fire Science Laboratory Ltd, K Yoshida, The Ship Equipment Inspection Society of Japan and T Noguchi, The University of Tokyo, Japan</i>	461
Effect of water mist and ventilation on engine room fire <i>Einar Arthur Kolstad, B Husted, Stord/Haugesund University College, Norway</i>	467
Very early fire detection in nursing homes <i>Kim Sommerlund-Thorsen, Danish Institute of Fire and security Technology (DBI), Denmark</i>	473
Explosive spalling in polymer concrete exposed to fire <i>Erica Ciapini, University of Florence, Italy</i>	479

Structural fire engineering – Applications under the Regulatory Reform (Fire Safety) Order 2005 <i>Eoin O’Loughlin, S Liptrott, AECOM (Fire & Risk Engineering), UK</i>	485
Modelling of pool fires in large geometries <i>Bjørn Lilleberg, D Muthusamy, GexCon, Norway</i>	491
Flame spread in the initial phase of a fire, experiments, calculations and simulations <i>Nina Schjerve, Vasko + Partner Engineers, Austria</i>	497
A novel methodology of electrically controlled sprinkler activation <i>LT Tanklevskiy, M Vasiliev, Gefest Enterprise Group, L Meshman, Russian Research Institute for Fire Protection, and A Yu Snegirev, A Tsoi, St.-Petersburg State Polytechnic University, Russia</i>	503
Modeling and reality of evacuation process <i>Dmitry Samoshin, V Kholshchevnikov, Academy of State Fire Service of Russia, Russia</i>	509
Minimizing crisis through knowledge and anticipation: Qualitative modeling of building evacuation process <i>Manuela Tancogne-Dejean, ATILH / University of Technology of Troyes and P Laclémence, University of Technology of Troyes, France</i>	515
Contribution to fire scenario evaluation in fire safety engineering <i>Audun Borg, O Njå, University of Stavanger, Norway</i>	521
Fire risk assessment of PVB glazing - A case study <i>Nishani Sakizlis, C Biotto, Mott Macdonald Limited and S Sambasivan, London Underground, UK</i>	527
Fire safety level of interior textiles and upholstered furnishing in Norway – considering health and environmental effects from changes in product safety regulations <i>Karolina Storesund, A Steen-Hansen, SINTEF NBL, Norway</i>	535
POSTER SESSION 2	
Experimental study on fire behaviour of real scale bed mattress <i>Kye-Won Park, J-G Jeong, FILK (Fire Insurers Laboratories of Korea), W-H Kim, Kyung-Min University, South Korea and Y Ohmiya, Tokyo University of Science, Japan</i>	541
Fire effects on high efficiency lighting <i>Richard Meier, P Kennedy, John A Kennedy and Associates, USA</i>	547
Science or science fiction? The use of human behavioral models in fire safety regulation <i>Elisabetta Carattin, University of Venice, Italy and V Brannigan, University of Maryland, USA</i>	553
Variance analysis of maritime passenger clusters travel speeds with regards to the head’s walking speed and head counts <i>Soo-Ho Lee, W-H Hong, Kyungpook National University, J-H Choi, Pukyong National University, K-I Hwang, Korea Maritime University and W-J Na, B-H Son, C-H Ahn, Daegu Technical University, Republic of Korea</i>	559
Immersive virtual environment as a method to experimentally study human behavior in fire <i>Kristin Andrée, D Nilsson, Lund University, Sweden and M Kinateder, University of Würzburg, Germany</i>	565
Essential system choices relevant to the capacity of escape routes in multistorey buildings <i>Peter van de Leur, M Klein, DGMR Consulting Engineers and N Scholten, Foundation Expert Center Regulations in Building, the Netherlands</i>	571

Modelling the response of occupants to warnings from different fire safety systems <i>Xia Zhang, X Li, G Hadjisophocleous, Carleton University, Canada</i>	577
Solving design challenges: Revisiting time equivalence <i>Angus Law, J Stern-Gottfried, N Butterworth, Arup, Germany</i>	583
Simulation of fire technical properties of products and construction barriers to support efficient product development in industry (FireTools) <i>Patrick van Hees, B Andersson, Lund University, Sweden and F Guay, D Lauridsen, A Bhargava, K Livkiss, B A Valiente, F V Lundström, K Wilkens, Danish Institute of Fire and Security Technology, Denmark</i>	589
FDS jet fan stream modelling – comparison with experimental data <i>Dorota Brzezinska, Technical University of Lodz, Poland</i>	593
A natural fire test to assess the behaviour of modern timber construction techniques: Light timber frame vs glued laminated timber <i>Dionysios Kolaitis, E Asimakopoulou, G Zannis, M Founti, National Technical University Athens, Greece</i>	599
Numerical and experimental analysis of concrete filled steel hollow columns subjected to fire <i>Helder Craveiro, JPC Rodrigues, University of Coimbra, Portugal, TAC Pires, University of Coimbra, Portugal / Federal University of Pernambuco, Brazil and JJR Silva, Federal University of Pernambuco, Brazil</i>	605
Model validation of thermal decomposition and container pressurization of polyurethane foam <i>Sarah Scott, M Larsen, A Dodd, Sandia National Laboratories and K Erickson, Consultant, USA</i>	611
Development of an innovative method for elementary heat release rate computation <i>Benjamin Truchot, S Patej, S Rahman, S Duplantier, INERIS, France</i>	617
Small scale screening tests to assess the self-heating potential of wood pellets <i>Ida Larsson, A Lönnermark, P Blomqvist, H Persson, M Rahm, SP Technical Research Institute, Sweden</i>	623
Bi-stable fire flows: Engineered design and assessment with the aid of computational fluid dynamics <i>Fabio Alaimo Ponziani, A Tinaburri, Ministry of the Interior, Italy</i>	629
Predicting the post-flashover temperature in a compartment fire using adiabatic gas temperature <i>Kuang-Chung Tsai, W-T Chung, National Kaohsiung First University of Science and Technology, Taiwan</i>	635
Pyrolysis of polymers exposed to high thermal radiative heat flux <i>Guillaume Rambaud, M Roudot, E Buzaud, CEA, DAM, GRAMAT, France</i>	641

POSTER SESSION 3

Fire-fighting robot kit to be used in tunnels and subsurface facilities and restricted space <i>Alberto Tinaburri, F A Ponziani, Ministry of the Interior and D Piatti, ROBOGAT Srl, Italy</i>	647
On the use of the Thermo-Gravimetric Analyser in fire investigations <i>Camille Riera, A Thiry, A Coppalle, J-P Garo, S Dupont, H Bazin, Central Laboratory of Police Prefecture (LCPP), France</i>	653

Accounting for arson fires in fire safety engineering <i>Martin Nilsson, N Johansson, P van Hees, Lund University, Sweden</i>	659
Lakanal Fire Investigation – Reconstruction and modelling in support of the Metropolitan Police and London Fire Brigade investigation <i>David Crowder, R Chitty, M Shipp, BRE Global, UK</i>	663
Experimental study on the influence of thermal feedback on the burning behavior of flexible polyurethane <i>Annemarie Poulsen, G Jomaas, Technical University of Denmark, Denmark and A Bwalya, National Research Council of Canada, Canada</i>	669
Comparing full-scale experiments with model-scale experiments to increase firefighter knowledge of fire dynamics <i>Stefan Svensson, Lund University, Sweden and S Kerber, Underwriters Laboratories, USA</i> ...	675
Proposals of standardized training procedure and indices indicating fire-fighters' fatigue <i>Yukihisa Kuriyama, Y Oka, Y Ito, M Enari, Yokohama National University, Japan</i>	681
New NFPA standard on assessment of fire loads <i>Marcelo Hirschler, GBH International, USA</i>	687
TRANSFEU Project – Development of a new classification system for the toxicity of fire gases from products on railway vehicles <i>Björn Bansemer, CURRENTA Analytics/Fire Technology, Germany and P Briggs, EXOVA Warringtonfire, UK</i>	693
The quantitative analysis of combustion gases from interior materials of rail passenger car by using FT-IR Spectroscopy <i>Woo-Sung Jung, D-H Lee, C-K Lee, T-w Kim, Korea Railroad Research Institute and J-y Park, Korea Polymer Testing & Research Institute, Korea</i>	699
Spread of fire to combustibles surrounding a car fire <i>Hiroki Miyamoto, T Otake, K Okamoto, M Honma, N Watanabe, National Research Institute of Police Science, Japan</i>	705
Harmonised fire safety for rolling stock in Europe – EN 45545 and RSSB <i>Beth Dean, Exova Warringtonfire & RSSB, UK</i>	711
Massmotion – A step in the right direction <i>Dermot O'Donnell, T Roberts, P Debney, Arup, Ireland</i>	717
Fire stops and fire-resistant sealing in timber constructions <i>Martin Teibinger, Holzforschung Austria, Austria</i>	723
Web based platform with interactive hazard analysis as a new approach to propagating fire engineering knowledge <i>Piotr Tofilo, M Konecki, J Galaj, M Cisek, N Tusnio, W Jaskolowski, The Main School of Fire Service, Poland</i>	729

AUTHOR INDEX

Volume 2

IGNITION / BURNING BEHAVIOUR

New method for calculating time to reach ignition temperature
*Ulf Wickström, Luleå University of Technology / SP Technical Research Institute,
J Sjöström, Luleå University of Technology and A Byström, SP Technical Research
Institute of Sweden, Sweden.....*735

Analysis of cone calorimeter ignition data: A reappraisal
*Marc Janssens, Southwest Research Institute, USA*743

Formal kinetics of polymer pyrolysis for modeling of ignition and burning in fire tests
*Alexander Snegirev, V Talalov, V Stepanov, St.-Petersburg State Polytechnic
University, Russia and J. Harris, Boeing Research and Technology, USA.....*755

IGNITION/BURNING BEHAVIOUR

On the balance between model complexity and uncertainty in computational pyrolysis
*Guillermo Rein, University of Edinburgh / Imperial College London, UK and
N Bal, University of Edinburgh, UK / Centre d'Etudes et de Recherches de
l'Industrie du Béton, France*769

Reaction to fire properties of surface charred wood
*Lazaros Tsantaridis, B Östman, SP Wood Technology, Sweden.....*781

Study of gas phase flame retardancy using the microscale combustion calorimeter
*Richard Walters, R Lyon, William J Hughes Technical Center, USA*789

FURNITURE

Requirements for fire safety of upholstered furniture
*Marcelo Hirschler, GBH International, USA.....*801

Flammability of upholstered furniture
*Thomas Fabian, P Gandhi, UL LLC, USA*813

Modeling the burning rate of upholstered furniture for different ignition scenarios
*Marc Janssens, Southwest Research Institute, K Overholt, University of Texas at
Austin and M Hirschler, GBH International, USA.....*827

Experimental study on the effectiveness of RIP cigarettes to fire ignition
*Fumiaki Sasaki, K Uyama, M Uetake, T Matsufuji, Japan Tobacco Inc, K Matsuyama,
Y Tanaike, A Sekizawa, Tokyo University of Science and Y Nagawa, K Ogino, YAZAKI
Energy System Corporation, Japan*839

TESTING

Identification of an alternate substrate for testing reduced ignition propensity cigarettes
*Amanda Robbins, BRANZ Ltd, New Zealand and R Gann, W Guthrie, NIST, USA*851

Effect of airflow on the heat release rate measured in the Ohio State University apparatus
*Richard Lyon, M Fulmer, R Walters, S Crowley, Federal Aviation Administration, USA.....*861

Use of the cone calorimeter for testing materials with low heat release rates
Sean Gregory, A Green, S Pasantes, Fire Testing Technology Ltd and S Grayson,

S Kumar, Interscience Communications Ltd, UK.....871
HUMAN BEHAVIOUR IN FIRE

Selecting occupant scenarios for deterministic fire safety engineering analysis
*Rita Fahy, National Fire Protection Association, USA and D Nilsson,
Lund University, Sweden883*

Investigating the impact of culture on evacuation behaviour – a UK data-set
Edwin Galea, G Sharp, L Filippidis, S Deere, M Sauter, University of Greenwich, UK.....893

Cultural elements of wayfinding in fire safety engineering. Results from recent
experimental work in Cyprus
*Georgios Boustras, K Katzis, European University Cyprus, N Paris, Civil Defense
Department and P Papazoglou, Cyprus Research Promotion Foundation, Cyprus.....907*

Evacuation behavior from tsunami and fire in the aftermath of the Great East
Japan Earthquake
Yuki Akizuki, University of Toyama and A Hokugo, T Nishino, Kobe University, Japan919

HUMAN BEHAVIOUR IN FIRE

An investigation into the circumstances surrounding fatal dwelling fires involving the
elderly during 1999-2009
Amy Harpur, K Boyce, N McConnell, University of Ulster, UK931

“Get Out, Stay Out” versus Occupier Independence: The results of an 18 month study
of human behaviour in accidental dwelling fires in Kent
*Owain Thompson, D Wales, Kent Fire and Rescue Service and L Hulse, E Galea,
University of Greenwich, UK.....943*

The impact of smoke on walking speed
Karl Fridolf, K Andrée, D Nilsson, H Frantzich, Lund University, Sweden.....955

HUMAN BEHAVIOUR IN FIRE

Experimental study of the effectiveness of dynamic signage system
Edwin Galea, H Xie, P Lawrence, University of Greenwich, UK.....967

Employing Validation and Verification tests as an integral part of evacuation
model development
*Enrico Ronchi, D Nilsson, Lund University, Sweden, O Zechlin, Siemens, Switzerland
and W Klein, H Mayer, Siemens, Germany979*

Validation of evacuation model using real data – What is the influence of the
composition of the population?
Janne Gress Sørensen, A Dederichs, Technical University of Denmark, Denmark.....991

The parameters of pedestrian flows in hospital during fire evacuation
*Dmitry Samoshin, R Istratov, Academy of State Fire Service of the Ministry of the
Russian Federation for Civil Defence, Russia1003*

HUMAN BEHAVIOUR IN FIRE

Exploring the current egress models capabilities for simulating evacuation of children
through stairs
*Arturo Cuesta, O Abreu, D Alvear, University of Cantabria, Spain and F Ancona,
Politecnico di Bari, Italy.....1013*

The development and validation of a rail car evacuation model
Edwin Galea, D Blackshields, P Lawrence, K Finney, D Cooney, University of Greenwich, UK.....1023

Exploring the appropriateness of the aviation industry evacuation certification requirements using fire and evacuation simulation
Edwin Galea, Z Wang, F Jia, University of Greenwich, UK.....1035

STRUCTURAL FIRE MODELLING

Thermal properties of heated insulation materials
Hans Olsen, J Sjöström, R Jansson, J Anderson, SP Technical Research Institute, Sweden..1049

Towards the development of a standard verification scheme for heat transfer codes for fire applications
Ann Jeffers, University of Michigan, USA and U Wickström, Luleå University of Technology / SP Fire Technology, Sweden.....1061

Capturing spatial variations of applied heat fluxes in finite element analyses of structural members
Paul Beata, A Jeffers, University of Michigan, USA1071

Analytical method for the calculation of heat fluxes received by a vertical member subjected to a localized fire in an open car park
Christophe Thauvoye, B Zhao, CTICM and O Vassart, ArcelorMittal R&D, France.....1083

STRUCTURAL FIRE MODELLING

Analytical interaction diagrams for reinforced concrete sections in fire conditions
Duc-Toan Pham, C Florence, H-H Nguyen, CSTB and P de Buhan, Université Paris Est, France.....1095

Cold-formed steel columns with restrained thermal elongation subjected to fire
Hélder David Craveiro, JP Rodrigues, L Laím, University of Coimbra, Portugal.....1107

FIRE RESISTANCE: TEST RESULTS

Fire resistance tests on circular concrete columns
Manfred Korzen, BAM Federal Institute for Materials Research and Testing, Germany and JP Rodrigues, L Laím, University of Coimbra, Portugal1119

Tests of continuous post-tensioned concrete slabs under localised fires
John Gales, L Bisby, T Stratford, M Krajcovic, University of Edinburgh, UK.....1131

The load-bearing performance of CLT wall elements in full-scale fire tests
Joachim Schmid, L Boström, A Just, A Gustafsson, SP Technical Research Institute, Sweden, A Menis, M Fragiaco, University of Sassari and G Bochicchio, Ivalsa Trees and Timber Institute, Italy.....1143

Full-scale fire performance of cross-laminated timber walls and floors
Christian Dagenais, L Osborne, FPInnovations and N Benichou, National Research Council of Canada, Canada.....1157

FIRE RESISTANCE

Full scale tests to study the influence of various parameters on the fire performance of hybrid timber connections
George Hadjisophocleous, S Ali, Carleton University, Canada.....1169

Experimental fire performance of thermoset carbon fiber epoxy panels under various types of structural loading
Alexander Brown, D Jernigan, A Dodd, Sandia National Laboratories, USA1181

The performance of cavity fire barriers in the external wall of timber frame buildings
Phil Clark, T Lennon, BRE Global, UK.....1195

FLAME RETARDANTS

An overview of recent environmental and health evaluations of flame retardants featuring the EU ENFIRO project
Adrian Beard, M Klimes, Phosphorus, Inorganic and Nitrogen Flame Retardants Association (PINFA), Belgium.....1203

Flame retardants in a sustainable world, recycling WEEE plastics is a technical and environmental challenge
Lein Tange, EFRA, J van Houwelingen, REWARD, W Hofland, ICL-IP and D Goossens, Albemarle, The Netherlands1213

Fire assessment of brominated and halogen free flame retardants in polymers using TGA-FTIR-ATR and Cone Residue-ATR
Michael Delichatsios, A Ramani, J Zhang, M Suzanne, S Ukleja, University of Ulster, UK.....1221

New flame retardant solutions for textile coating
Sieghard Goebelbecker, R Borms, R Stenekes, ICL-IP Europe, The Netherlands and E Rapaport, O Mizrahi, I Shalev, ICL-IP, Israel1233

Composites in fire: Fire behaviour tailored for different applications
Bernhard Schartel, BAM Federal Institute for Materials Research and Testing, Germany1239

FLAME RETARDANTS

Polyallylamine-montmorillonite as super flame retardant coating assemblies by layer-by-layer deposition on polyamide film
Kadir Apaydin, Centre de Recherche Public Henri Tudor, Luxembourg / ENSCL, France, A Laachachi, V Ball, V Toniazzo, D Ruch, Centre de Recherche Public Henri Tudor, Luxembourg and M Jimenez, S Bourbigot, ENSCL, France.....1241

New modification of sodium montmorillonite using ammonium phosphate monobasic and its application as fire retardant for high density polyethylene
Mohamed Hassan, M Nour, A Mohamed, National Institute for Standards and I El-said, Menoufia University, Egypt1251

New class of brominated polymeric flame retardants for use in polystyrene foams
Christine Lukas, Dow Chemical Co UK Ltd, H Hollnagel, Dow Europe GmbH, Switzerland and I Beulich, J C Bloom, M Beach, J Davis, J Hull, B King, S Kram, T Morgan, W Stobby, The Dow Chemical Co, USA.....1263

THERMAL INSULATION

Fire testing of ETICS a comparative study
Birgitte Messerschmidt, Rockwool International, Denmark and J Fellman, Paroc OY, Finland.....1269

The performance of insurer certified PIR (polyisocyanurate) core steel faced sandwich panels in real building fire situations
Mostyn Bullock, Tenos Ltd and M Harris, Kingspan Ltd, UK.....1279

Facades– fire safety aspects in the context of increasing use of thermal insulation

<i>Edith Antonatus, BASF, Germany</i>	1291
---	------

PERFORMANCE BASED CODES

Improving the uptake of fire safety performance standards – the verifiers perspective <i>David Meikle, I Sanderson, Glasgow Caledonian University, UK</i>	1303
--	------

Risk and uncertainty in current practice on structural design for fire safety <i>Fredrik Nystedt, H Frantzich, Lund University, Sweden</i>	1315
---	------

The Vulcan Initiative: A web platform for the next generation of performance-based fire protection design <i>Alberto Alvarez, M Ferreira, Brian Meacham, Worcester Polytechnic Institute, USA</i>	1327
--	------

Fire loss statistical considerations in relating failure and building damage to the building code objectives <i>Peter Senez, K Calder, H Li, Sereca Fire Consulting Ltd, Canada</i>	1337
--	------

FIRE SERVICE

Stochastic operation time modelling of rescue situations <i>Terhi Kling, S Hostikka, T Rinne, J Vaari and T Hakkarainen, VTT Technical Research Centre, Finland</i>	1347
--	------

Simulating the rescue service response in a railway tanker fire <i>Jukka Vaari, T Kling, S Hostikka, T Rinne, VTT Technical Research Centre of Finland and J Ketola, Emergency Service College, Finland</i>	1359
--	------

Simulation of fire development and spread in Japanese-style rooms under different ventilation conditions <i>Masakatsu Honma, T Otake, H Miyamoto, K Okamoto, N Watanabe, National Research Institute of Police Science, Japan</i>	1371
--	------

Post-use analysis of firefighter turnout gear: Phases I, II, & III <i>Meredith Cinnamon, S Trenkamp, D Cotterill, E Easter, University of Kentucky, USA</i>	1383
--	------

NATURAL DISASTERS

Post-earthquake fire safety of historic buildings in densely-built urban areas of Kyoto, Japan <i>Keisuke Himoto, Kyoto University, Japan</i>	1395
--	------

Fire performance of earthquake-damaged buildings: Overview and preliminary analysis of full-building earthquake and fire tests <i>Jin Kyung Kim, H Park, B Meacham, Worcester Polytechnic Institute, USA</i>	1407
---	------

Firebrands generated from full-scale building components and structures under an applied wind-field <i>Samuel Manzello, NIST, USA, S Suzuki, National Research Institute of Fire and Disaster (NRIFD) and J Suzuki, Y Hayashi, Building Research Institute (BRI), Japan</i>	1419
--	------

STRUCTURAL FIRE DESIGN

Progress on travelling fires: Novel concept for the structural design of large enclosures <i>Guillermo Rein, Imperial College London, J Stern-Gottfried, A Law, Arup, Y Jiang, M Gillie, A Usmani, University of Edinburgh and P Kotsovinos, Arup / University of Edinburgh, UK</i>	1431
--	------

Limitations of existing time-equivalence formula for determining fire resistance requirements of buildings <i>Anthony Abu, University of Canterbury, H Gerlich, Winstone Wallboards Ltd and C Wade, BRANZ Ltd, New Zealand</i>	1441
---	------

Contribution of cross laminated timber panels to room fires
*George Hadjisophocleous, C McGregor, Carleton University and S Craft, CHM Fire
Consultants Ltd, Canada*.....1453

Fire resistance of timber constructions – Evaluation of improved design models
Martin Teibinger, Holzforschung, Austria.....1465

Application of structural fire safety engineering to a gymnasium: A comparative study
Nicolas Henneton, C Renaud, B Zhao, CTICM, France.....1477

FIRE INVESTIGATION

Arc breakdown in air over very small gap distances
Vytenis Babrauskas, Fire Science and Technology Inc, USA.....1489

Evaluating electrical receptacle fires
Craig Beyler, M Benfer, D Gottuk, Hughes Associates Inc, USA.....1499

Electrical fires: An analysis of a UK fire service data collection
Tom Cockcroft, R Bryant, Canterbury Christ Church University, UK.....1511

FIRE INVESTIGATION CONT/

Contribution to the investigation of the fire in an avalanche cover and train set at
Hallingskeid Railway Station, June 2011
Anne Steen-Hansen, S Fjær, C Sesseng, K Storesund, SINTEF NBL, Norway.....1523

Outcomes and lessons learned from the major investigation of the Lakanal fire in
London UK
Peter Mansi, Fire Investigations (UK) LLP, UK.....1535

Investigation of the fire in Atherstone-on-Stour UK using reconstruction and fire modelling
David Crowder, R Chitty, M Shipp, BRE Global, UK.....1547

Experimental And Finite Element Modelling Of Protected Cellular Beams In Fire Conditions
Klelia Petrou, A Nadjai, F Ali & H Sanghoon. University of Ulster, UK..... 1559
